## ACADEMIC BASIC TUTORIAL

**https://apastyle.apa.org/about-apa-style**

*APA provides writers with a consistent format they can use every time they write. Consistency helps authors organize their arguments or research efficiently. From the information on the title page to the headers that divide information in the discussion, each section has a predetermined format.*

*APA formatting also helps authors organize ideas along the same lines that researchers use, with a spin-off benefit: When you're familiar with the different parts of APA, you'll find it easier to read the resources you find in the library.*

*All APA-formatted papers -- from the papers you turn in for class to papers published in journals -- contain most, if not all, of the following parts, always in the same order:*

- *Title page*
- *Abstract*
- *Introduction*
- *Review of the literature*
- *Methods*
- *Results*
- *Discussion*
- *Conclusion*
- *References*

*While you might not include all nine parts in academic papers, you still use a majority of these sections to order and present your ideas.*

- *In-text citations, when used in a paper and on the References page, should always match. Keep in mind that both in-text and reference citations should start with the same author's name. If no author is named, the title of the work should come first.*
- *In-text citations should be used anytime you use information from a source, even if you paraphrase or summarize it in your own words.*
- *Direct quotations are a special case. Anytime you take three or more consecutive words from a source, put quotation marks around those words and add the in-text citation and page number.*

### *The Future Benefits of Artificial Intelligence for Students*

ABEL GUERRA. URBE
INFORMATION TECNOLOGY SPECIALIST
*July 06, 2023*

*Introduction: Artificial Intelligence (AI) is rapidly evolving and has the potential to bring significant advancements to various industries. In the realm of education, AI holds great promise in transforming the learning experience for students. In this article, we will explore the potential benefits that AI can bring to students in the future, revolutionizing the way they learn, engage, and excel academically.*

*1) Personalized Learning: AI has the potential to revolutionize personalized learning. With AI-powered algorithms, educational platforms can tailor learning materials and activities to meet the individual needs of each student. By analyzing data on students' progress, strengths, and weaknesses, AI systems can adapt the curriculum to ensure optimal learning outcomes for each student. This personalized approach enhances student engagement, boosts motivation, and maximizes learning potential.*

## GUESS WRITER COLUMN

*2) Intelligent Tutoring Systems: AI can provide intelligent tutoring systems that offer personalized guidance and support to students. These systems utilize natural language processing and machine learning algorithms to engage in real-time conversations with students, answering their questions, providing explanations, and offering targeted feedback. Intelligent tutoring systems empower students to seek assistance whenever needed, enhancing their understanding of complex concepts and promoting self-directed learning.*

**St. Patrick's Day**

*St. Patrick's Day is celebrated annually on March 17, the anniversary of his death in the fifth century.*

*The Irish have observed this day as a religious holiday for over 1,000 years. On St. Patrick's Day, which falls during the Christian season of Lent, Irish families would traditionally attend church in the morning and celebrate in the afternoon.*
*Lenten prohibitions against the consumption of meat were waived and people would dance, drink and feast–on the traditional meal of Irish bacon and cabbage.*
