

DID YOU KNOW THAT?

URBE University Library has a Web Page with relevant information for your courses. You can access this page through the link:

<https://library.urbeuniversity.edu/>

The URBE Library Web Page has different sections such as Catalog, Digital Repository, Databases, Training and Docs, APA, Newsletters, and Request Assistance.

In the session: **Databases** you can find Open Access Databases such as Dialnet, OpenStaxt, Management Library, etc. These Databases include different types of documents: Electronic Books, Dissertations. Articles, Institutional Repositories, etc. Also, you can find Private Databases: LIRN (URBE Virtual Library) and Florida Electronic Library.

If you have doubt or need training contact to:

Librarian. Karely Carrion

DID YOU KNOW THAT?

URBE University Library has an important Database:

ProQuest Central

The most comprehensive, diverse, and relevant multidisciplinary research database available.

PROQUEST CENTRAL BRINGS together many of our most used databases across all subject areas to create an incredibly broad and comprehensive content set.

Multi-Disciplinary. ProQuest Central offers great value by including databases in Business, Health and Medical, Social Sciences, Education, Science, and Technology, as well as core titles in the Performing and Visual Arts, History, Religion, Philosophy, and Language and Literature.

Key Titles, Diverse Content. The collection provides access to not only scholarly journals, but also to high value market research, country, economic and industry

reports, essential pre-print working papers, and full-text dissertations, as well as a vast number of professional journals, and general interest periodicals.

It also includes full-text news sources from all over the world, which provide context to the extraordinary scholarly content in ProQuest Central.

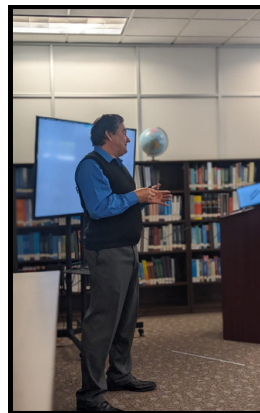

Discoverability. Content discovery is an integral part of the ProQuest platform's goal of driving better outcomes for our customers and their users. To this end, ProQuest content is discoverable through Primo, Summon, OCLC WorldCat, and Google Scholar.

Clean Interface. With its clean interface and responsive design, the ProQuest platform delivers a modern research experience that guides users' discovery, access and management of rich, varied content sources

EVENTS

Celebrating World Book Day with our MBA and English Students at the URBE Library

On April 24th, we celebrated World Book and Copyright Day at our URBE University Library. We had readings and a presentation on Space.

Networked Digital Library of
Theses and Dissertations

REDALYC

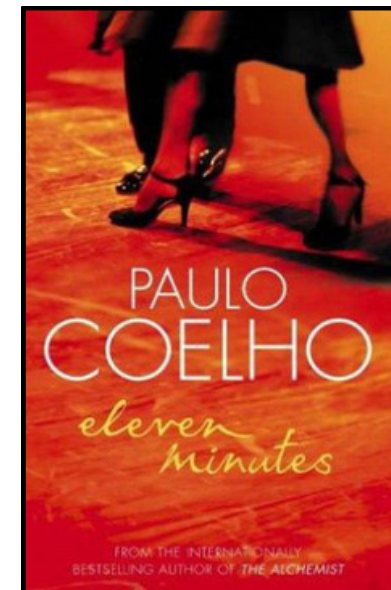

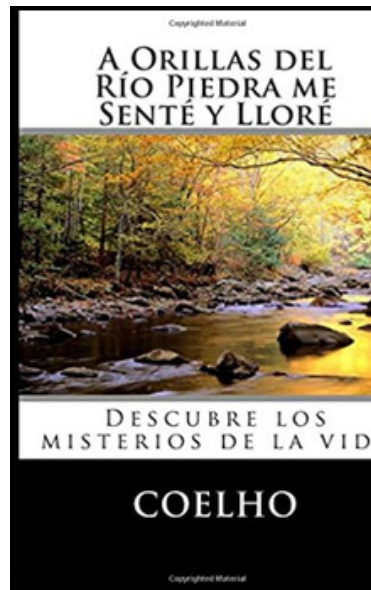

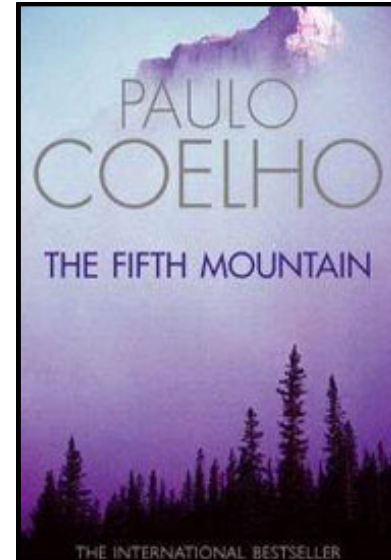

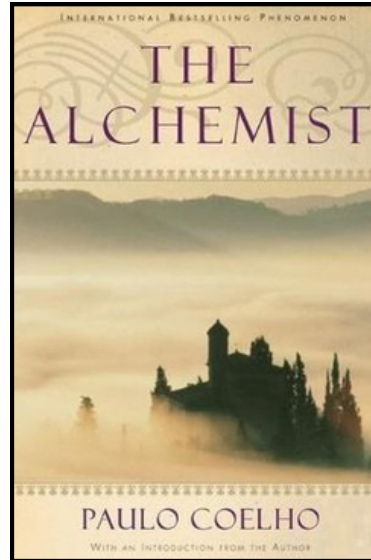

"Reading opens the doors of knowledge and gives wings to our inspiration and imagination."

Reasons why reading is important to all of us.

1. Increase our curiosity and knowledge.
2. It keeps us informed.
3. Facilitates communication.
4. Helps to understand texts, and improves grammar, vocabulary, and writing.
5. Release our emotions: joy, sadness, anger, fear, surprise, loves ...

THE BEST BOOKS OF PAULO COELHO

“ El libro es fuerza, es valor, es poder, es alimento; antorcha del pensamiento y manantial del amor. ”

Rubén Darío

GUEST WRITER COLUMN***"My Philosophy of Education"***

**Dr. Luis R. Naredo. Faculty MBA
URBE University**

To be most effective as an instructor, I must create a safe environment that is interactive and collaborative and promotes problem-solving and critical-thinking skills. A welcoming environment accommodates a variety of adult learning styles and encourages students to present their opinions while respecting the opinions of others. By giving them a voice in class, not only do the students benefit from peer-to-peer learning by enriching the course material with firsthand experiences and knowledge, but they also take responsibility for their own learning and, therefore, enhance the integration of their new knowledge into practice.

GUEST WRITER COLUMN***"My Philosophy of Education"***

I attempt to make my classroom an arena for my students to learn skills and demonstrate outcomes. I invite my students to ask questions and give their views on the material we are covering.

I solicit anonymous feedback in the form of "one-minute papers" from my students about assignments as well as my teaching style, and I then implement student suggestions to improve my service delivery and their learning outcomes.

I create assignments that improve students' problem-solving and critical thinking skills, such as analyzing the economic behavior of society.

I utilize small-group discussions to actively involve the students in their critical thinking skills. I strive to implement strategies that create a collaborative environment and encourage the application of knowledge to new situations.

These strategies help students become ready and able to utilize their knowledge in their studies and their future employment

GUEST WRITER

“The Human Being: A Multi-Planetary Species”

**PHD. Hebert Molero. MBA STUDENT
URBE UNIVERSITY**

Do we have to move to another planet? It seems like science fiction, but it is NOT!

Introduction

The prospect of humans becoming a multi-planetary species may sound like science fiction, but it is a topic of increasing relevance and importance in today's world. Earth has experienced numerous extinction events throughout its history, from volcanic eruptions to meteor impacts and other cataclysmic events. As stewards of our planet, it is crucial to consider the possibility of leaving Earth in case of emergency, with the hope of a gradual and well-prepared transition to another celestial body within our solar system.

GUEST WRITER

Preparation for Planetary Migration

While the immediate need for such a migration may not be imminent, we must begin preparing for the possibility. The development of advanced spacecraft capable of transporting humans beyond Earth is underway. Notable examples include NASA's System Launching System (SLS), China's Long March rocket series, and SpaceX's Starship, with its impressive load capacity and potential for large-scale space missions.

Destination Considerations

One of the key questions in this endeavor is where to go. In the short term, the Moon presents itself as a feasible destination, offering a stepping stone for further exploration. Mars, with its potential for terraforming to create an Earth-like atmosphere, is a compelling option for long-term habitation. Additionally, natural satellites such as Jupiter's moons Europa and Ganymede are also under consideration as potential habitats for human colonization.

Conclusion

In conclusion, the concept of humans becoming a multi-planetary species is not merely speculative but a proactive measure to ensure the survival and continuity of humanity.

By investing in space exploration and developing the necessary technologies, we are taking the first steps towards a future where humans can thrive beyond the confines of Earth. This journey may be gradual and challenging, but it holds the promise of unlocking new frontiers and securing our place in the cosmos.

In a future issue, we shall address the economic potential of spatial exploration.
