NEWS

"I WANT TO SHARE WITH YOU THAT... "

URBE University Library has a lot of Learning Resources that you can use for your courses.
We have around 950 Print Books, also we have a Virtual Library (LIRN) that includes 133 DATABASES from different Publishers that covers all subjects, and URBE Digital Repository with EBooks, Ebusiness Cases, Articles, etc.
To use these resources you can access thru: https://proxy.lirn.net/URBEUniv. , or directly in Canva into your course.
If you have a doubt, we can help you, send an email to : library@urbeuniversity.edu

"DID YOU KNOW THAT... "

In URBE Digital Library (LIRN) you can find the **PROQUEST ABI/INFORM Collection Database.**
This Database includes **ABI/INFORM Global, ABI/INFORM Trade and Industry, and ABI/INFORM Dateline.**
The database features thousands of Full-Text Journals, Dissertations, Working Papers, Key Business and Economics Periodicals such as the Economist, country- and industry-focused reports, and downloadable data.
Its international coverage gives researchers a complete picture of companies and business trends worldwide.
You can access and use all information in this Database for your courses, only you need to access: https://www.lirn.net/, or through your link directly to the Database in your course in Canva.

If you have doubt or need training contact to:
Karely Carrion, URBE Librarian
Email: library@urbeuniversity.edu or
karely.carrion@urbeuniversity.edu

EVENTS

Library Orientation for New Students Fall A-2024
Date: Sept 3 and 4, 2024
Time: 2:00 to 3:00 PM
WHERE: Zoom Platform

Find a Job Online

Over the past several years, the Internet has become an essential part of any job search. But with so many resources available online, it can be difficult to know where to begin and how to use them effectively.
In this lesson, you'll learn how to use job search engines/job alerts to find different opportunities. We'll also talk about how to respond to an online job posting, and how to stay safe when searching for a position.

Conducting an effective Online Job Search

The Internet has made it easier than ever to discover new opportunities. There are hundreds of websites that allow you to search for job postings and upload your resume, such as _Monster_ and _CareerBuilder_.

Using job Search Engines and Job Alerts

Rather than search through various websites, you can use a job search engine such as _Indeed_ or _SimplyHired_. Job search engines collect job listings from hundreds of websites so you can view them in a single place.

Posting your Resume Online

Some sites allow you to post your resume online. When employers need to fill a job opening, they can search through online resumes to find a candidate   that fits their needs. This can increase your chances of finding a job because employers will have the ability to search for you. Some sites will also use the information in your resume to automatically send you relevant job postings.

How I Use Google's Custom Language Model to Supercharge My Studies. Andy Cornier. July 20,2024

Google has a little-known AI tool called **NotebookLM** that's perfect for students. It's a free tool that uses Google Gemini to power its processing and output. NotebookLM can be a bit complicated to use effectively, but you can use it to supercharge your studies and research.

What Is NotebookLM?

NotebookLM is a self-contained large language model (LLM) that uses the notes and documents you provide as sources. When you upload files—PDFs, Google Drive documents, web URLs, and more—it creates a summary of each source, which you can read by clicking on the source in the left menu.

Once you've uploaded documents, you can get NotebookLM to generate notes based on them by writing prompts. Based on your uploads, it also suggests questions you might ask to generate notes. You can also include or exclude specific sources when writing prompts, so you can ignore less relevant information.

Find Sources of Information

The standout feature of NotebookLM is that it provides links to the exact point in a source its information is from. If you upload 10 documents and ask a question, NotebookLM will add a citations section which lists where it pulled its information from. For example, using several articles as sources, I can see which article provides which piece of information.

NotebookLM Doesn't Replace Your Effort

As useful as NotebookLM is at accelerating research and synthesizing your notes, you still need to do research, write notes, and discern the outputs you receive. I treat NotebookLM as a useful tool to assist in my graduate schoolwork and not a replacement.

What Would Miguel de Cervantes Think if He Had Known About Artificial Intelligence?

How would Miguel de Cervantes, the immortal author of "Don Quixote de la Mancha", have reacted to the amazing era of Artificial Intelligence (AI)?
This question takes us on a fascinating imaginative journey, uniting two worlds: the rich literary tradition of the Spanish Golden Age and the innovative technology of the 21st century.

1. A Meeting Between Eras
1.1 The Surprise of Cervantes
In this section, we imagine Cervantes' first encounter with AI. The author's mix of wonder, curiosity, and possibly skepticism offers us a window into how a Golden Age mind might interpret the advances of the 21st century.

"At first, Cervantes would be perplexed, perhaps even afraid of this new 'magic.'
However, his innate curiosity and keen sense of observation would soon lead him on a fascinating exploration of this new world."

1.2 First Impressions

Here, we explore how Cervantes might have conceptualized AI, likely seeing it as just another character in his rich narratives, full of complexities and nuances.

BEST ARTICLES

«Cervantes could have seen AI as a character in his novels: complex, full of possibilities and, at times, contradictory. Perhaps a digital Sancho Panza is always ready to assist but with his peculiarities.»

Reimagining "Don Quixote de la Mancha" with AI
To take our creative exploration a step further, let's consider how the beginning of "Don Quixote de la Mancha" could have been rewritten with the help of AI. We present an adapted version, where modern technology merges with the classic style of Cervantes.

2) Cervantes and the future of AI

«On the one hand, Cervantes could imagine a utopian future where AI solves humanity's major problems. On the other hand, he would not abandon his natural skepticism, reflecting on possible dystopian scenarios.»

3) Literary Legacy in the Age of AI

We consider how Cervantes would have viewed the role of AI in preserving and disseminating his legacy, ensuring that his works remain relevant and accessible in the digital age.
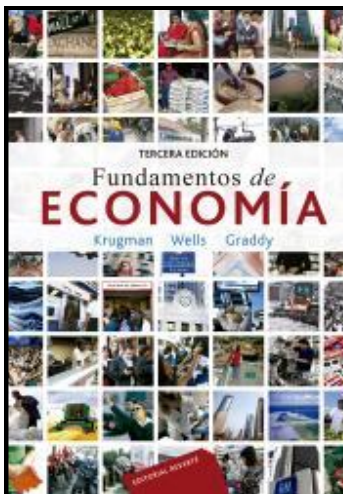

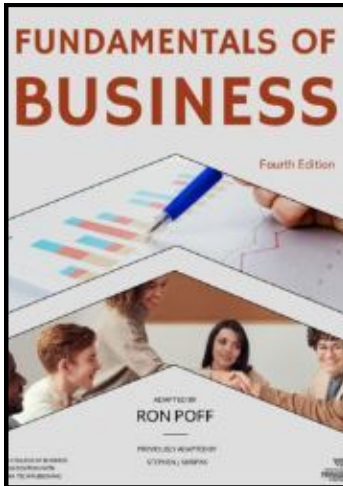

Reimagining "Don Quixote" with AI

«In a place on the net, whose name I do not want to remember, not long ago there lived a gentleman of the kind with a keyboard at the ready, an old monitor, a weak CPU and a standard internet connection. A pot of something more empty than full, sprinkled with data and codes more than meat, duels and setbacks on Saturdays, lentils on Fridays, some pigeons on Sundays, consumed three parts of his estate...»

Promoting Multilingual Education

On September 8, 2024, UNESCO will celebrate International Literacy Day (ILD) with the theme "Promoting Multilingual Education." This theme not only highlights the importance of literacy but also recognizes it as a fundamental human right.

Literacy is crucial for personal and social development, but its effectiveness hinges on a critical factor: the language in which it is taught. Learning in one's mother tongue enhances comprehension, improves academic outcomes, and strengthens cultural identity. However, millions of children around the world do not have access to education in their native language, creating significant barriers to their learning.

In a globalized world, the ability to communicate in multiple languages is more valuable than ever. Multilingual education not only prepares students to actively participate in a diverse world but also promotes equity by respecting linguistic diversity.

Despite the challenges of implementing multilingual programs, this celebration is a call to action for governments, organizations, and communities to recognize and value linguistic diversity in education. By doing so, we not only ensure the human right to literacy but also build a more inclusive and just world.
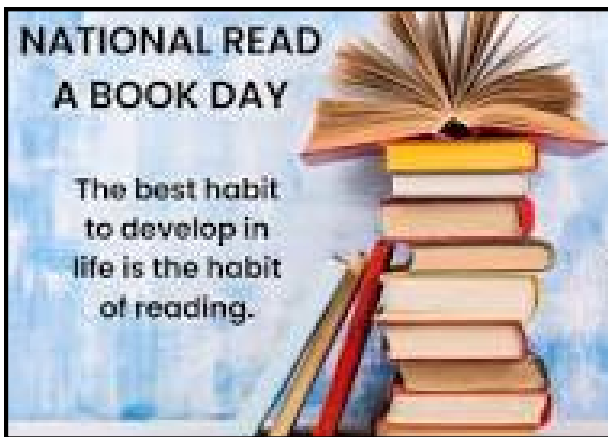

Promoting multilingual education is a powerful strategy to transform education and, with it, the future of millions of people worldwide.

HOLIDAY

FRIDAY, SEPTEMBER 6, 2024
National Read a Book Day

NATIONAL READ A BOOK DAY

The best habit to develop in life is the habit of reading.

National Read A Book Day *is a holiday that all bibliophiles can celebrate. It's a day dedicated to anyone who loves to read and wants an entire day to do it. And thanks to our fast-paced high-tech world, books are something that needs to be celebrated and enjoyed.*
After all, a good book can whisk us to a distant land, challenge our most tightly held-on to beliefs, or even just give us something to think about.
*I**f you want to celebrate it, all you have to do is to pick up a book and start reading.***

International Literacy Day

International Literacy Day

*I**International Literacy Day***, *observed on September 8th each year, serves as a poignant reminder of the transformative power of reading. It was established by the United Nations Educational, Scientific and Cultural Organization (UNESCO) to highlight the importance of literacy as a foundation for lifelong learning and sustainable development.*
*The theme for 2024 is **"Promoting multilingual education: literacy for mutual understanding and peace".***
The theme explores how literacy can be used to promote mutual understanding, social cohesion, and peace.

Labor Day is a federal holiday in the United States celebrated on the first Monday of September to honor and recognize the American labor movement and the works and contributions of laborers to the development and achievements of the United States.
