“YOU SHOULD KNOW THAT...”

URBE University Library has a Web Page with relevant information for your courses. You can access this page through the link:

<https://library.urbeuniversity.edu/>

The URBE Library Web Page has different sections such as Catalog, Digital Repository, Databases, Training and Docs, APA, Newsletters, and Request Assistance.

In the session: **Databases** you can find Open Access Databases such as Dialnet, OpenStax, Management Library, etc. These Databases include different types of documents: Electronic Books, Dissertations. Articles, Institutional Repositories, etc. Also you can find Private Databases: LIRN (URBE Virtual Library) and Florida Electronic Library (For Florida Residents).

If you have doubt or need training contact to:

Librarian. Karely Carrion
Email: library@urbeuniversity.edu or
karely.carrion@urbeuniversity.edu

“I WANT TO SHARE WITH YOU THAT...”

URBE University Library has an important Database:

ProQuest Central

The most comprehensive, diverse, and relevant multidisciplinary research database available.

PROQUEST CENTRAL BRINGS together many of our most used databases across all subject areas to create an incredibly broad and comprehensive content set.

Multi-Disciplinary. ProQuest Central offers great value by including databases in Business, Health and Medical, Social Sciences, Education, Science, and Technology, as well as core titles in the Performing and Visual Arts, History, Religion, Philosophy, and Language and Literature.

Key Titles, Diverse Content. The collection provides access to not only scholarly journals, but also to high value market research, country, economic and industry

reports, essential pre-print working papers, and full-text dissertations, as well as a vast number of professional journals, and general interest periodicals.

It also includes full-text news sources from all over the world, which provide context to the extraordinary scholarly content in ProQuest Central.

Discoverability. Content discovery is an integral part of the ProQuest platform’s goal of driving better outcomes for our customers and their users. To this end, ProQuest content is discoverable through Primo, Summon, OCLC WorldCat, and Google Scholar.

Clean Interface. With its clean interface and responsive design, the ProQuest platform delivers a modern research experience that guides users’ discovery, access and management of rich, varied content sources

Evaluating Online Resources

There are several aspects that you should look for in evaluating online resources. You should check:

1) Who published the content (Authority)

The author of the content is a concern when considering the eligibility of the content. First of all, the author should be an expert on the subject discussed in the article. He should have the credentials to back up his knowledge of the subject matter.

Usually, the information about the author can be found on the website along with the content. The name of the author can be found below the title, on the side of the article, or at the bottom. Sometimes, more information on the author is found below the article, also known as an author's bio.

2) Publication

If the information about the author is not present, the publisher of the resource article can be checked for authority.

Take a quick look at the website, its logo, the URL of the website, and other indicators that can prove its reliability on the topic. One quick look at the URL can help you determine if it's a reliable source or not. Trustworthy websites end in .org, .edu, .gov, or any recognizable web address.

3) Currency and Relevance

How can you determine if the content that you're looking at isn't outdated? How do you check if the data you have is current and timely?

Look for the date of publication. Oftentimes, it is located near the title of the resource. You can look for the date at the side information of the article, and even at the end of the article.

Evaluating Online Resources

There are several aspects that you should look for in evaluating online resources. You should check:

4) Accuracy

In writing, accuracy refers to a writer's correctness in using the language system. This means that the writer's use of grammar and vocabulary should be correct and as good as it could be.

Minimal errors are virtually present in all kinds of publications, but poor spelling and grammar can easily reflect how careless an author is, and this may result in distrust.

Accuracy also refers to whether an online resource is correct with its facts. Online resources can be verified easily through a quick search on the Internet. Other resources provide a reference list that can help in double-checking facts cited in the article.

5) Purpose and Objectivity

An online resource should teach, inform, explain, or persuade.

By reading the article, it should become evident what the article aims to impart to its readers. The author should not be biased with his views reflected in the article unless stated otherwise. You should comprehend whether the content is backed up with facts or based on opinion and propaganda

6) Links

Links are used for citing and to credit references found on other websites. Links used on the content should be useful and relevant to the topic of the content. Make sure you only link to timely, relevant content.

For example, if the links within the content proceed to a 404 page or "Not Found" the content may be outdated.

GUESS WRITER

[PTM: las ayudas económicas que reciben los migrantes](#)

*Lawyer and Master in Public Administration
Barbara Puglisi Spadaro. MBA URBE Student*

The challenge for migrants and refugees during the duration of the migratory route and the first months upon arriving in the destination country is to generate economic resources that allow them to pay the minimum for services, housing and food.

As I have written previously, the money that people gather to migrate is "salt and water", the expenses are multiple: tickets, accommodation, food, payment of legal procedures, but these increase if the person has decided to carry out the immigration process through irregulars like the Darién hikers, whose money goes to paying tolls, robberies, ransom payments, among others.

GUESS WRITER

Many migrants are left in the middle of nowhere or in transit countries without enough money to eat or a place to sleep and require public and private aid to support themselves. For this reason, Monetary Transfer Programs (TPM) were born, a crucial instrument to support migrants and refugees in their search for stability and well-being.

These programs, which provide direct financial assistance to displaced individuals and families, not only represent an act of humanity and global solidarity, but also offer an effective avenue to address immediate needs as they can provide a crucial lifeline, providing displaced families with the resources necessary to cover their basic needs, such as food, housing and medical care.

If you want to read the Complete Article go to : IBEROECONOMIA: España en positivo.

Dialnet is a cooperation project that integrates different documentary resources and services.

Database of Hispanic scientific content. Currently we can find in Dialnet Magazine Articles, Books and Articles from Collective Books, Conference Proceedings, Doctoral Theses, Reviews of other publications.

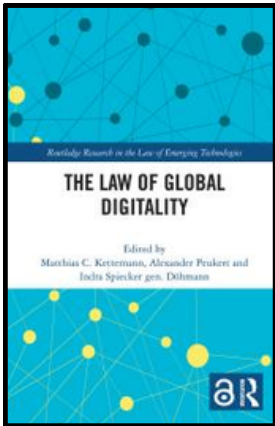

DOAB is a community-driven discovery service that indexes and provides access to scholarly, peer-reviewed open access books and helps users to find trusted open access book publishers. All DOAB services are free of charge and all data is freely available.

Over 81,500 academic peer-reviewed books. Includes ebooks over different topics: Education, Media Studies, Society, Education, Medicine, etc.

*Open Access Scholarly Journal Publishing
Maximise scholarly journal impact through open access, expert scholarly journal publishing services, quality peer reviews, and cost-effective production.*

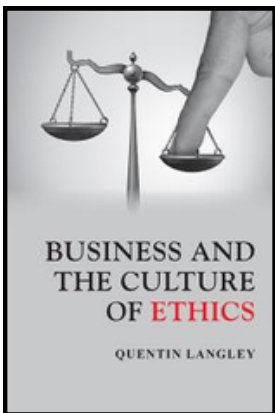

You can browse the AOSIS open access scholarly journal collection per scholarly field and browse by keyword or per author at library.aosis.co.za. All our open access scholarly journal content is free, and available to everyone upon publication. A physical copy can be purchased at the AOSIS Shop.

NEW Ebooks

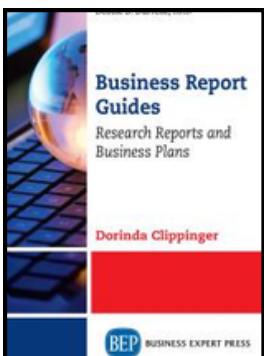

The Internet is not an uncharted territory. On the Internet, norms matter. They interact, regulate, are contested and legitimated by multiple actors. But are they diverse and unstructured, or are they part of a recognizable order?

The book compares six different areas of law that have been particularly exposed to global digitality, namely laws regulating consumer contracts, data protection, the media, financial markets, criminal activity and intellectual property law.

This book explores **Business Ethics** as applied in a modern context including data management, corporate social responsibility, media ethics, and government ethics. Ethics are not the same as morals.

They are contextual and apply to specific relationships. Drawing on the work of philosophers, the work is nonetheless contemporary and practical.

This book offers tactics for creating business plans as well as research reports. Readers will find guides for planning research projects; writing proposals; identifying major findings; drawing conclusions; and using them to recommend appropriate actions--along with citing sources, numbering pages, and displaying visuals.

The book examines business plans--why entrepreneurs need them, the objectives and contents of business plans, and how-to guides for each part.

HOLIDAY

Father's Day is held on the **Third Sunday in June**. This year, Father's Day falls on **Sunday, June 16, 2024**. It celebrates the contribution that fathers and father figures make for their children's lives.

Flag Day is a holiday celebrated on **June 14** in the United States. It commemorates the adoption of the flag of the United States on June 14, 1777 by resolution of the Second Continental Congress.
